

WHAT IS CLAIMED IS:

1. A toilet paper holder comprising:

a roll paper retainer (1);
a holding plate (2) for cutting roll paper; and
a roll paper rotatable supporting member (3a),
the retainer (1) including a back plate (1b)
having a guide portion (1a) for sliding the holding
plate (2) at its both side edges, and a pair of holding
plates (1c, 1d) extending vertically from the back plate
(1b), which is provided with the rotatable supporting
member (3a) movable so that a roll paper (R) is freely
removable,

the holding plate (2) including a back plate (2a),
which is fitted into the guide portion (1a) of the
retainer (1) and is slidable, and a holding plate (2b),
which has a substantially vertical bent portion, and
is formed so as to forwardly project,

a distal end portion (2c) of the holding plate (2)
being positioned on a substantially vertical line from
the center of the roll paper (R).

2. A toilet paper holder comprising:

a roll paper retainer (1);
a holding plate (2) for cutting roll paper; and
a roll paper rotatable supporting member (3a),
the retainer (1) including a back plate (1b)
having a guide portion (1a) for sliding the holding
plate (2) at its both side edges, and a pair of holding
plates (1c, 1d) extending vertically from the back plate

(1b), which is provided with the rotatable supporting member (3a) movable so that a roll paper (R) is freely removable,

the holding plate (2) including a back plate (2a), which is fitted into the guide portion (1a) of the retainer (1) and is slidable, and a holding plate (2b), which has a substantially vertical bent portion, and is formed so as to forwardly project,

a distal end portion (2c) of the holding plate (2) being positioned on a substantially vertical line from the center of the roll paper (R), and having a slight clearance so as not to contact with the roll paper (R) rotatably supported.

3. The toilet paper holder according to claim 1 or 2, wherein the roll paper rotatable supporting member (3a) provided on the inner side of the holding plate (1c, 1d) is provided with a pawl portion (3b), which extends to the roll paper side in a state of being inclined so as to face each other.
